The Columbia-Gorge Locking Mailbox is made in the USA. Incoming hopper style door and an outgoing mail clip. Heavy duty box comes with a flag and a custom made lock with 9000 possible keys. Available in Black, Dark Coffee Brown, Grey and Green heavy duty powder coat. Matching posts and newspaper boxes are available.

Both the previous Columbia and the Gorge mailboxes have always had the exact same measurements. The install hole patterns on the boxes are also exactly the same. We also have hundreds of neighborhoods around the country that specify our boxes). By combining these into one, we can streamline the manufacturing process while still offering the same great mailbox.

The only difference is the **optional** flag and the outgoing mail clip which cannot be seen until the hopper is open. By combining the hopper door from the Gorge and adding an optional flag and the outgoing clip we have one mailbox that fits everyone's needs: accepts some packages exactly what the Gorge was famous for and for those few people who want the convenience of being to mail out from their mailbox which was the selling point for the Columbia the Columbia-Gorge has the clip.

Here is the information about the boxes. It is shown in black. It is still available in white for the HOAs that require this color.

COLUMBIA-GORGE Secure Locking Mailbox

Want to mail mail out? Slip your outbound mail under the clip and raise the flag.

Unfortunately it also signals everyone you have outbound mail.
Mailbox Solutions Inc recommends that all mail be dropped in a secure USPS drop box.
